## Don't put all your eggs in one basket

"You shouldn't put all your eggs in one basket."

How often have you heard that said over the years? We usually hear it after we've done just that. It's like the admonisher thinks he's doing us a favor by reminding us after the fact.

But your electric cooperative and the 24 other distribution co-ops serving Ohio have had that philosophy for many years. We saw the need to diversify our

generation portfolio long before the current national energy debate began. Our generation is predominantly coal-based. However, over the last 10 years, we've been adding natural gas and renewable energy sources to our generation mix.

In 1999 Buckeye Power, Inc., the generation-and-transmission cooperative that provides our wholesale electricity, announced it was building its first natural gas-fired "peaking" unit. The 510-megawatt (MW) plant, representing a final investment of \$187 million, was designed to operate during times of peak electric demand. This combustion turbine unit, completed in 2002, was our first noncoal generation facility. We were among the first utilities in Ohio to diversify in this manner.

We followed this project by purchasing an existing peaking unit in 2007 near Greenville in Darke County. This plant added approximately 200 MW of capacity at a cost of about \$49 million. At the time of the purchase, Buckeye Power President and CEO Tony Ahern stated, "This purchase provides us with the peaking power we need to meet the growing electricity needs of our cooperative members. And by purchasing these existing assets, we will realize a substantial savings compared to the costs of

building new generation."

This is an important point to repeat. The opportunity to purchase existing generation at a cents-on-the-dollar discount compared to original installed cost is preferable in most cases to building a new power plant. Because it takes, on average, seven to 10 years to permit, design and construct a conventional base load coal-fired power plant (even longer for a nuclear reactor), material costs, labor and interest rates can become volatile factors. Even environmental regulations can change over such a long time period, requiring additional expensive upgrades to meet state or federal standards. This is why many generation utilities are hesitant to launch new base load projects in these uncertain times.

But demand for power still drives the industry. And you can be sure that in seven to 10 years, Ohio electric co-op members will require more kilowatts than they are consuming today. Buckeye Power has continued to add gen-

(Continued on page 26)

### Tip of the Month

Replace any light bulb that burns more than one hour per day with its equivalent compact fluorescent bulb.

# Save the cooperative way

*Mid-Ohio Energy members save \$4,638.22 on prescriptions through the Co-op Connections Program*

Since the roll out of the Co-op Connections® program back in May, members have been reaping the benefits. As the cost of energy continues to rise, one way to offset these increases is to use your Mid-Ohio Energy Co-op Connections card. A Co-op Connections card was mailed directly to you in May. If you do not have one or need a replacement, contact the office today and we will get one right out to you.

The Co-op Connections member benefit program allows you to receive great discounts from local, regional and national outlets. One of the most popular member benefits is the prescription drug discount. In the first two months of the program (May and June), Mid-Ohio Energy members have saved more than \$4,600 on 119 prescriptions.

Co-op members can now use their Co-op Connections cards at more than 56,000 national and regional pharmacy chain stores, including CVS, Rite-Aid, Walgreens, Wal-Mart, Target and many more with savings of 10 to 60 percent on prescriptions. Present your card with your prescription at a participating pharmacy to receive your discount. Visit [www.locateproviders.com](http://www.locateproviders.com) to locate a participating pharmacy near you. Members also can search online for discounted prescription prices at [www.rxpricequotes.com](http://www.rxpricequotes.com).

Members also can go online to our Web site, [www.midohioenergy.com](http://www.midohioenergy.com), and find the full list of participating businesses under the Co-op Connections icon on the home page.

This is just one more way you benefit from being a cooperative member. As a Touchstone Energy cooperative, we are always “looking out for you.”

## Co-op Connections Program

Two new local benefits are added to the Co-op Connections Program.

### Tons of Fun Travel

Full-service travel agency providing airline and Amtrak tickets, vacation packages, destination weddings, honeymoons, all-inclusives and bus trips. We offer a honeymoon registry. Let us do all the work and you'll have tons of fun on your next trip. Free, no obligation quotes.

Discount offer: \$25 discount on 5+ nights vacation or cruise packages which include airfare.

Where to redeem this offer: 12507 St. Rte. 309, Kenton. 888-528-0396.

Web site address:  
<http://www.tonsoffuntravel.net>

### LF IT Services

Services include computer repair, networking, dial-up Internet services, Web hosting and design, domain services, on-site and remote service, VPN solutions and more! Call: 740-382-2881 or e-mail: [info@LFITServices.com](mailto:info@LFITServices.com). Hours: M-F 8:30 a.m.–5 p.m. Others by appt.

Discount offer: \$10 off computer repair service.

Where to redeem this offer: 605 E. Center St., Marion (by appointment).

Web site address: <http://www.lfitservices.com>

## Don't put all your eggs in one basket

(—continued from page 25)

eration, including a 55-MW entitlement of hydropower from the New York Power Authority and a 203-MW share of the generation from Ohio Valley Electric Corporation (OVEC). This was followed by the purchase of another 214-MW share from OVEC in 2009.

Within the last 12 months, Buckeye also has acquired a considerable amount of renewable energy, including a contract for up to 30 MW of output from a commercial wind farm in Iowa and the purchase of power from two agricultural bio-digesters in Ohio.

These generation acquisitions have an effect on the rates you pay for electricity, just as the rates Ohio co-op members paid in the 1970s, '80s and '90s were impacted by the decision to build and own the two Cardinal Station units—today our generation flagships.

At the time of the Greenville purchase, Pat O'Loughlin, vice president of Power Supply and

chief operating officer for Buckeye Power, observed: “This gives us a bridge over uncertain regulatory and legislative times and buffers co-op members from the costs of additional base load generation. Building a new coal-fired power plant today entails extremely high risks, even if you can get regulatory approval. Global climate change issues and future greenhouse gas laws mean special treatment and scrutiny for new plants.”

So, what's the point of all this? You've seen an increase in your cost of wholesale power in the last few months. In part, this is a direct result of growing our generation capacity.

Buckeye Power's long-range forecast shows it will have the lowest cost of wholesale power among all of Ohio's electric providers for at least the next five years. This is the result of strategic planning as demonstrated by these purchases. A diverse portfolio of energy will provide you with affordable, reliable power well into the future.

# Make the swap for efficient light bulbs

Last year Mid-Ohio Energy began the compact fluorescent light bulb (CFL) exchange program. Since the program's start, members have exchanged more than 9,000 incandescent bulbs for energy-saving CFLs. The program has been extended for this year and members are eligible to receive an additional nine bulbs per household.

Here's a look at the ways in which CFLs will help you save:

- They can last as long as 10 incandescent bulbs, saving you the cost and hassle of replacing bulbs.
- They use up to 75 percent less energy.
- If you trade them at our offices, the bulbs are free! In comparison, you could expect to spend as much as \$20–\$30 in stores to get your allotted nine bulbs.

## Other fast facts

### *Selecting the best location:*

CFLs perform best in open fixtures that allow airflow, such as in table and floor lamps and wall sconces. If you are replacing your bulbs outside, you may want to consider bulbs marked for cold tempera-

tures. Standard CFLs will work outside but may be dim in Ohio's cold winter weather.

### *Replacing incandescent bulbs:*

Because CFLs are unique by comparison, members often have questions about making the new bulbs fit in when replacing incandescent bulbs. If you have a dimmer or three-way fixture, be sure to select CFLs marked specifically for these uses. When it comes to matching up light output, look for the "watt equivalent" to match up to the wattage of the bulb you are replacing. Socket adapters are available if you are having trouble fitting a new CFL into a lamp.

### *Proper disposal:*

Because CFLs contain a small amount of mercury (about 5 milligrams or 1/100th of an old mercury thermometer), simple precautions should be considered when disposing of bulbs. Many CFLs have a warranty and can be returned to the retailer if still under warranty. Local recycling options are limited in many areas. If you can't find a proper location, unbroken bulbs can be taken to Mid-Ohio Energy's offices. If all else fails, the EPA recommends sealing the bulb in two plastic bags and placing it in the trash.

## Resources to help save energy

An unseasonably mild summer allowed many cooperative members to hold down home cooling costs and keep energy use low. Now that fall is on its way, the time is ideal to take steps to minimize your home's winter use. Your cooperative offers advice and energy-calculating tools to help you make wise decisions when it comes to using energy. This section aims to inform you about available resources and other programs designed to save—on both electric and other day-to-day costs.

### Log on for energy-saving tips and tools

Visit our Web site at [www.midohioenergy.com](http://www.midohioenergy.com) to access a wealth of helpful information. Here's an overview:

- Under "Member Information," choose "Energy-Saving Tips" to see 101 easy steps you can utilize to conserve in your home. Here you will find tips for saving in the kitchen, at the computer and more.
- Use the Energy Calculator feature to generate a scenario specific to your home and see how much you could save by upgrading appliances or cutting down on time of use.
- The "Ask Your Energy Advisor" link on the home page assists those looking to weather-proof, build or remodel, or simply replace an old appliance.
- Touchstone Energy Savers pools information

about cost-cutting measures for homes and businesses along with government rebates all into one convenient location.

## In memory of Neal Johnston

*August 29, 1924–July 14, 2009*

Neal Johnston, who served as a board member of United Rural Electric and Mid-Ohio Energy for 20 years, died on July 14 at Hardin Memorial Hospital. Neal was elected to the United Rural Electric Board in 1982 and served through the merger with Marion Rural Electric to form Mid-Ohio Energy. After the merger, the board reorganized from 16 members to nine, and at that time Neal retired from the board in 2002.

Neal was a Mount Victory native, where he was a lifelong farmer. Neal not only served his electric cooperative and community, he also served his country in the U.S. Army during World War II. Neal was a member of the Mount Victory United Methodist Church, where he served on several committees. He was a member of the former Mount Victory Lions Club. Neal also was a Hale Township trustee for 24 years.

Neal is survived by his wife, Doris, two sons, four grandchildren and 10 great-grandchildren. We extend our deepest sympathies to the Johnston family.

# Unclaimed capital patronage

The following members have unclaimed capital patronage that we declared in 2005. These amounts represent the members' share of margins that were generated by the Cooperative during the years these people were living in the cooperatives' service areas and purchasing electricity from United Rural Electric or Marion Rural Electric (now Mid-Ohio Energy Cooperative, Inc.). Attempts to reach these people by mail were returned because of incorrect or insufficient addresses. These names appeared in *Country Living* magazine in 2005 and several times since then. As required by Mid-Ohio Energy's Code of Regulations, four years following the mailing of notices and 60 days after two consecutive notices in *Country Living* magazine, the unclaimed funds revert to the cooperative to be reallocated to patrons. **This is the second notice.**
